Springer. Paperback. Book Condition: New. Paperback. 229 pages. Dimensions: 9.2in. x 6.1in. x 0.6in. This Lecture Notes in
Computer Science (LNCS) volume contains the papers
presented at the Second International Workshop on
Computational Forensics (IWCF 2008), held August 78, 2008. It
was a great honor for the organizers to host this scientific event
at the renowned National Academy of Sciences: Keck Center in
Washington, DC, USA. Computational Forensics is an emerging
research domain focusing on the investigation of forensic
problems using computational methods. Its primary goals are
the discovery and advancement of forensically relevant
modeling, computer simulation, and computer-based analysis
and recognition in studying and solving forensic problems. The
Computational Forensics workshop series is intended as a
forum for researchers and practitioners in all areas of
computational and forensic sciences. This forum discusses
current challenges in computer-assisted forensic investiga-
tions and presents recent progress and advances. IWCF addresses a
broad spectrum of forensic disciplines that use computer tools
for criminal investigation. This year's edition covers
presentations on computational methods for individuality
studies, computer-based 3D processing and analysis of skulls
and human bodies, shoe print preprocessing and analysis, natural language analysis and information retrieval to support
law enforcement, analysis and error visualization of speech...

Reviews

Comprehensive guide for pdf fanatics. It is filled with knowledge and wisdom. It is extremely difficult to leave it before concluding, once you begin to read the book.
